Arblu®
About bathrooms

IT “La doccia può cambiare sensibilmente il benessere all’interno della stanza da bagno, non solo a livello estetico, ma anche di comfort, grazie ad aspetti tecnici e dettagli che la rendono sicura e di facile manutenzione.”

EN “The shower enclosure can significantly change the well-being inside the bathroom, not only in terms of aesthetics, but also of comfort, thanks to technical aspects and details that make it safe and easy to maintain”.

Pier Giorgio Presotto
Titolare / Owner

arblu.it

^{IT} Arblu è un'azienda friulana fondata nel 1996 da Pier Giorgio Presotto. Da oltre vent'anni propone prodotti e servizi per l'arredobagno sempre più evoluti: alle pareti doccia e sopravasca si sono via via affiancati box e piatti doccia, quindi pannelli per rivestimenti, infine tutto l'arredobagno, dal mobile ai termoarredi fino alla carta da parati. Arblu è la soluzione made in Italy per il bagno contemporaneo. Dalle superfici coordinabili ai colori Metal, ultima tendenza dell'arredo, dal gres alle carte da parati waterproof, dai legni alle resine e ai laccati, l'obiettivo è dare al cliente la possibilità di progettare un bagno su misura, secondo le proprie possibilità e in linea con i propri gusti.

^{EN} Arblu is a Friulian company founded in 1996 by Pier Giorgio Presotto. For over twenty years, it has been offering ever more advanced products and services for bathroom furnishings: the shower cabins and bath screens have gradually been joined by shower enclosures and shower trays, then wall coverings, and finally all the bathroom furnishings, from the furniture to decorative radiators and wallpaper. Arblu is the Made in Italy solution for the contemporary bathroom. From surfaces that can be coordinated with Metal colors, the latest furnishing trend, from stoneware to waterproof wallpapers, from woods to resins and lacquers finishes, the goal is give to the customer the opportunity to design a custom bathroom, according to his / her possibilities and tastes.

Progetta la tua doccia con Arblu

Project your shower enclosure with Arblu

^{IT} I bagni non sono tutti uguali e Arblu, con questo strumento, presenta una serie di soluzioni specifiche per sfruttare al meglio lo spazio a disposizione, integrando il box doccia nell'ambiente bagno a seconda della sua architettura e degli altri elementi presenti al suo interno. Dalla tipologia di apertura - battente, scorrevole e pieghevoli - fino ai separet e i sopravasca, una guida semplice e accessibile alla scelta e alla progettazione della propria doccia in sintonia con le proprie esigenze.

^{EN} Bathrooms are not all the same and Arblu, with this tool, presents a series of specific solutions to take advantage of the available space, integrating the shower enclosure into the bathroom according to its architecture and the other elements inside it. From the type of opening - wing, sliding and folding - to the separet and bath screens, a simple and accessible guide to choosing and designing your own shower in tune with your needs.

La tipologia Type

Pareti doccia / Shower enclosures

Separet

Sopravasca / Bathscreens

IT La configurazione classica, la più conosciuta ed usata, chiude lo spazio della doccia tra vetri, definendo così il box.
EN The classic configuration, the best known and most used, closes the shower space between glasses, thus defining the shower enclosure.

IT Separet, il massimo della essenzialità, in una soluzione capace di armonizzarsi con gli ambienti più diversi.
EN Separet is the basic walk-in solution that fits many different environments.

IT Sopravasca, la soluzione più semplice per abbinare il comfort della vasca alla vitalità e praticità della doccia.
EN Bathscreens, the easiest solution for joining the comfort of the bath to the vitality and practicality of the shower.

Gli spazi speciali The particular spaces

**Lato fisso sagomato /
Shaped fixe side**

^{IT} Il vetro può essere sagomato, così da personalizzarne la forma a seconda delle esigenze specifiche: che siano sedute in muratura o mensole su cui appoggiare i propri prodotti.
^{EN} The glass can be shaped to customize the shape according to specific needs: masonry seats or shelves to support your products.

Tenuta all'acqua Waterproof

Estetica impeccabile e impermeabilità totale / Perfect aesthetic and total waterproof

^{IT} A seconda del tipo di soluzione adottata, la tenuta all'acqua è garantita da chiusure magnetiche, guarnizioni aggiuntive, cerniere sollevabili e bordini salvagoccia, oltre al profilo inferiore quando previsto e dal sigillante cristallino.

^{EN} Depending on the model, the waterproof is assured by magnetic closures, additional gaskets, lifting hinges, threshold bars and crystalline sealant, in addition to the bottom profile when available.

Sigillante cristallino / Crystalline sealant

^{IT} Il sigillante cristallino, applicato sotto i vetri fissi, crea una barriera sicura contro la fuoriuscita dell'acqua. Ha la caratteristica di essere trasparente, non ingiallisce e non è attaccabile da muffe.

^{EN} The crystalline sealant, applied under the fixed glass, creates a safe barrier against water leakage. It has the characteristic of being transparent, does not get yellow and it is not attackable by mold.

Facilità di pulizia Easy cleaning

Trattamento anti presa d'acqua Timeless / Timeless anti water gripe treatment

^{IT} Il trattamento Timeless si effettua direttamente in fase di produzione delle lastre di vetro, non altera la trasparenza del vetro e la percezione dei colori. Il vetro è protetto dalla corrosione, non si opacizza e mantiene tutta la sua bellezza in quanto l'acqua scorre rapidamente lasciando pochi depositi di calcare. In normali condizioni di utilizzo è garantito anticorrosione per 10 anni.

^{EN} Timeless treatment is made directly during production of the glass sheets, does not alter the transparency of the glass and its colour perception. As a result, the glass is protected against corrosion, does not become opaque and keeps its attractive appearance since water flows away quickly leaving fewer limestone deposit. In standard conditions of use the glass anti-corrosion effect is guaranteed for 10 years.

Trattamento anti presa d'acqua Shower Glass Protect / Shower Glass Protect anti water gripe treatment

^{IT} Il trattamento Shower Glass Protect serve a rendere il vetro del box doccia inerte verso i processi di corrosione e ossidazione, prevenendo così la perdita di trasparenza, brillantezza e nitidezza. L'efficienza media del trattamento Shower Glass Protect in condizioni d'uso standard è di 5 anni, che possono prolungarsi ad 8* con l'utilizzo dello specifico kit di mantenimento (presente a catalogo) denominato After Care.

^{EN} Shower Glass Protect treatment helps keeping the glass of shower enclosures reluctant to corrosion and oxidation, preventing loss of transparency, brilliance and clearness. The average efficacy of Shower Glass Protect treatment in standard conditions of use is about 5 years, which can be extended up to 8* years thanks to the specific After Care cleaning kit (available in our catalogue).

^{IT} Arblu facilita la pulizia anche nei punti difficili, grazie a soluzioni come le cerniere interne sollevabili, le guarnizioni perimetrali estraibili anche sul lato fisso, i carrelli a sgancio rapido per le ante scorrevoli.

^{EN} With Arblu every corner is easy to clean, thanks to lifting hinges, removable bottom gaskets even under the fixed sides, sliding doors with removing system.

Consigli utili Useful tips

^{IT} Oltre alle dotazioni di serie, i box doccia possono essere personalizzati con optional speciali: chiedi al tuo rivenditore oppure contattaci sulla pagina facebook Arblu.

^{EN} Besides standard equipment, our shower enclosures can be personalized with extra optionals: ask your retailer or contact us on the Arblu facebook page.

^{IT} Presta attenzione ai movimenti delle ante: quando apri il box assicurati di avere spazio sufficiente tra la doccia e gli altri componenti del bagno (che sia il mobile, il termoarredo o anche solo il muro).

^{EN} Pay attention to the movements of the doors: when you open the shower enclosure make sure you have enough space between the shower and the other components of the bathroom (furniture, the decorative radiator or even the wall).

^{IT} Controlla che le piastrelle abbiano la giusta altezza e cerca di evitare la presenza di elementi decorativi o strutturali sporgenti, per non avere problemi di accessibilità e pulizia.

^{EN} Make sure the tiles have the right height and try to avoid projecting decorative or structural elements for easy accessibility and cleaning.

^{IT} Ricorda: prendi le misure del piatto doccia quando è installato, mai prima. Misura il perimetro esterno e le dimensioni del bordo.

^{EN} Remember: take the measurements of the shower tray when it is already installed, never do it before. Measure the outer perimeter of the shower tray and the dimensions of the edge.

Piatti doccia Shower trays

" A volte tendiamo a dare per scontati gli elementi fondamentali, come il piatto doccia: non solo è necessario per appoggiarvi sopra il box, ma deve anche unire all'estetica un'eccellente performance tecnica.

" Sometimes we tend to underestimate the fundamental elements, such as the shower tray: not only is it necessary to rest the shower enclosure on it, but it must also combine aesthetics with excellent technical performance.

Focus

^{IT} La creazione di uno spazio in cui i materiali, seppur diversi, siano tra loro coordinati è la sfida e desiderio di molti progettisti contemporanei. Grazie al sistema di superfici Pietrabilu, è possibile rivestire tutti gli elementi della propria stanza da bagno: top, lavabi, arredi, termoarredi, piatti doccia e persino pareti, chiaramente anche interne alla doccia.

^{EN} Creating a space in which the materials, even if different, are coordinated with each other is the challenge and desire of many contemporary designers. Thanks to the Pietrabilu surface system, it is possible to cover all the elements of your bathroom: tops, washbasins, furniture, radiators, shower trays and even walls, obviously even inside the shower enclosure.

^{IT} Lo scarico si può posizionare centrale, sul bordo o a scomparsa, nelle finiture cromate, laccate o nello stesso materiale del piatto – la scelta più interessante in caso di superfici particolari. Il modello Grip permette di posizionarlo sul lato corto o sul lato lungo.

^{EN} The drain can be positioned centrally, on the edge or concealed, you can find it in chromed or lacquered finishes or in the same material as the shower tray – the most interesting choice in the case of particular surfaces. The Grip model allows you to place it on the short side or on the long side.

Pareti doccia Shower enclosures

^{IT} Una scelta in sintonia con lo spazio disponibile: è molto importante scegliere un sistema di apertura adatto a garantire la massima facilità di movimento quando si entra e si esce dal box, e anche durante le operazioni di pulizia. Ad esempio l'anta scorrevole garantisce il minimo ingombro, l'anta battente la massima apertura. Arblu propone molteplici tipologie di pareti doccia per armonizzarsi con ogni spazio e personalizzare ogni situazione, in un perfetto equilibrio di estetica e funzionalità.

^{EN} A choice in harmony with the available space: it is very important to choose an opening system suitable to ensure maximum ease of movement when entering and leaving the shower enclosure and also during the cleaning operations. For example, the sliding door guarantees minimum space, the wing door maximum opening. Arblu offers multiple types of shower walls to harmonize with every space and customize every situation, in a perfect balance of aesthetics and functionality.

Separet

" L'ultima tendenza dello spazio dedicato alla doccia è il separet, che mette in dialogo l'area doccia con il resto della stanza. Come una scenografia trasparente, il separet si presta a dare vita a progetti di interior design originali e contemporanei, anche grazie alla possibilità di personalizzare la finitura del vetro e dei profili metallici.

^{EN} The separet is the latest trend in the space dedicated to the shower enclosure, which makes the shower area communicate with the rest of the room. Like a transparent scenography, the separet lends itself to giving life to original and contemporary interior design projects, also thanks to the possibility of customizing the finish of the glass and metal profiles.
